Hi everyone! we are giving away free subdomains:

<http://yourname.mangyan.net>

This is a cost free and annoying ad free URL forwarding service (a.k.a URL redirection) allowing anyone to take any existing website address (ie. www.yourprovider.com/users/yourname/) and turn it into a short and memorable subdomain like <http://you.mangyan.net>

Just Post all requests here

Restrictions:

Not allowed for Porn Site.

Hi lionheart, in your case, you are already using second level domain, similar to what we provide here. But if you still need it, just post your choice in this format:

<http://yourchoice.mangyan.net> -- indicate the address where you want this to redirect.
